

MEDICINE EVALUATION PROCESSES ENVISAGED FOR SAHPRA

1

Jeanette Lotter (PhD)

Director: Medicines Evaluation & Research

South African Health Products Regulatory Authority

SAPRAA meeting: 13 April 2018, Midrand

2

Requested topics

- ▶ New submissions (NCE/clone/generic)
- ▶ Post-registration amendments
- ▶ Pre-Registration responses to Committee recommendations
- ▶ Pre-registration amendments

3

Pre-registration amendments

- ▶ 9.40_Changes_during_registration_process_Jun11_v1.pdf
 - ▶ Write an official request (not an e-mail) to obtain permission for the change;
 - ▶ Clearly indicate this as an additional change in the letter of application and in the Amendment Schedule;
 - ▶ All the relevant documents and data as for a post-registration amendment have to be submitted;
 - ▶ Arrange with Santhani for a set to be delivered to her, in order to have this for the inspectorate report and to amend the database in Siamed;
 - ▶ This is not evaluated and approved separately by the inspectorate, but is done as part of the registration process;
 - ▶ Final approval will therefore only be given when the registration certificate is issued.

4

Need for change

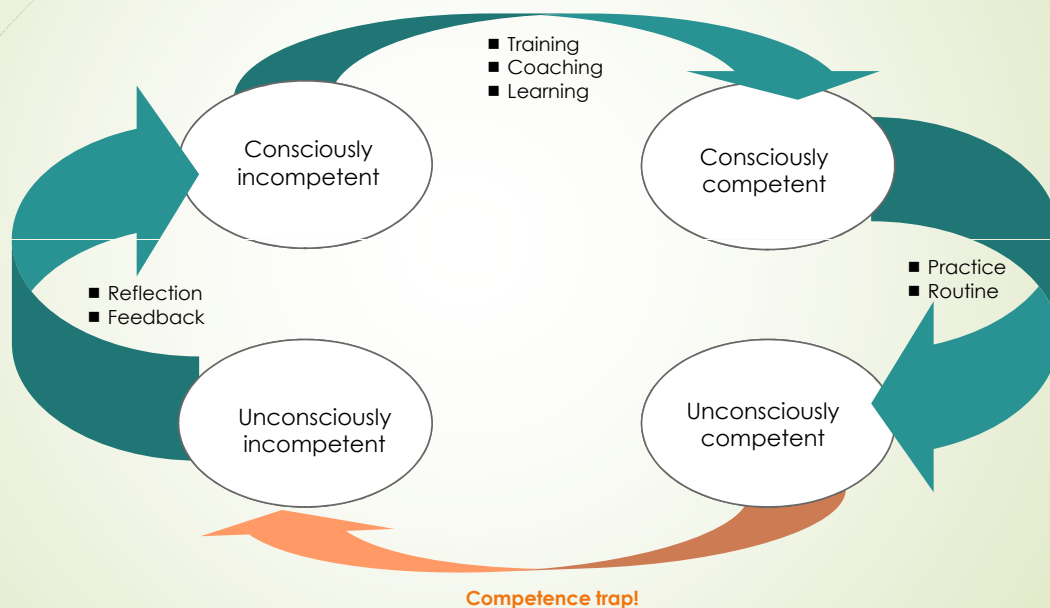

- ▶ Delays in evaluation attributable to —
 - ▶ increasing number of generic applications;
 - ▶ registration without intent to market/distribute;
 - ▶ historical procedures for fast-track;
 - ▶ large number of post-registration variations/amendments;
 - ▶ IT systems and infrastructure;
 - ▶ absence of project management and logistical support;
 - ▶ limited abbreviated procedures and application of reliance models;
 - ▶ availability of skilled technical reviewers.

5

Competence & efficiency cycle

6

“The” question

- How do we optimise the regulatory decision-making process, within the framework of the Act, to improve efficiency?

High priority task team

- SAHPRA Board Committee: "Technical Operations & Regulatory Strategy" in collaboration with SAHPRA middle and senior managers
 - Section 2B(2) of the amended Medicines Act allows for information exchange, cooperation agreements, work-sharing and recognition of work done by other regulatory authorities → no longer a question of 'if', but when and how...
 - procedures, processes & requirements under development.
- Board resolution: imminent engagement with Industry groupings

25/08/2017 NEW PROCESS

Receiving → Allocation → Database

1) Dedicated workstreams
2) Involve Project Coordinator
3) Electronic Knowledge

GUIDING PRINCIPLES

Electronic documents
- Communicate to Industry? - MEIR
Submit CD + 1 hard copy - Normal process

04/07/2017

- 1) Technical Screening
- 2) [Update classier]
- 3) Unit manager + Project Office - allocation

REG COMPLIANCE

1. LAW ENFORCEMENT
2. INVESTIGATE
3. RESULTS
4. PASS

3 WITH OWN

1. PROJECT OFFICE
2. PROJECT COORDINATOR
3. PROJECT MANAGER

4. EVALUATION

1. SECTION 21
2. BUSINESS OPERATIONS
3. REGULATIONS
4. REGULATORY
5. REGULATIONS
6. REGULATIONS
7. REGULATIONS
8. REGULATIONS
9. REGULATIONS
10. REGULATIONS

11. REGULATIONS
12. REGULATIONS
13. REGULATIONS
14. REGULATIONS
15. REGULATIONS
16. REGULATIONS
17. REGULATIONS
18. REGULATIONS
19. REGULATIONS
20. REGULATIONS

BASED ON WORKSTREAMS

WORKSTREAM ADMINIS (DEFAULT/TENTATIVE)

What about abbreviated evaluation?

- ▶ Example: quality review
 - ▶ Module 2 → good overview and start to the evaluation;
 - ▶ But the main review is based on module 3;
 - ▶ However, a well written module 2 could allow the Regulator to base parts of the actual review on Module 2 (rather than Module 3), and only referring to module 3 for critical topics;
 - ▶ Could therefore potentially ask for submission of only specific parts of Module 3...

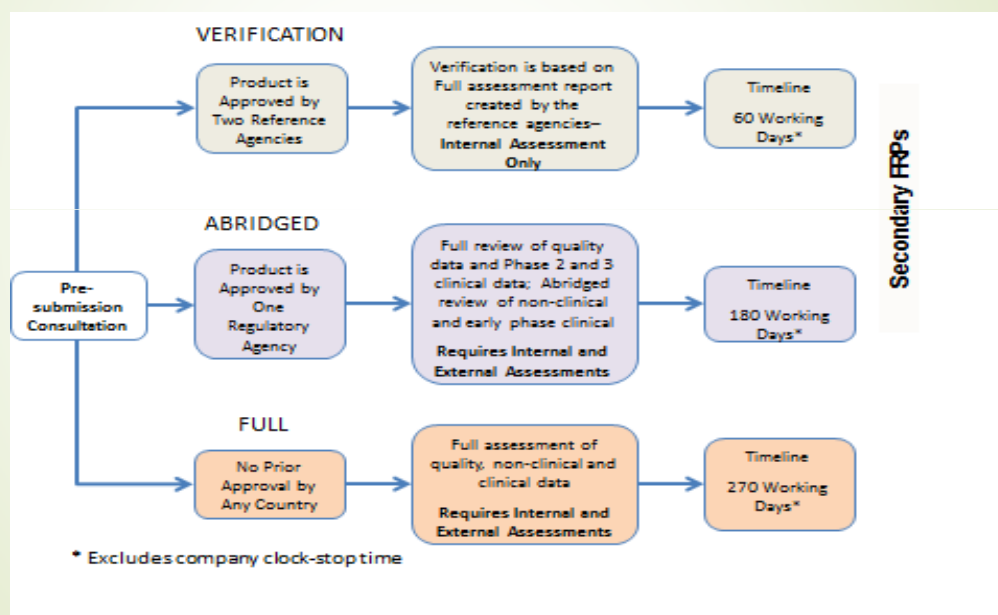

"Without data
you're just
another person
with an opinion."

- W. Edwards Deming
Data Scientist

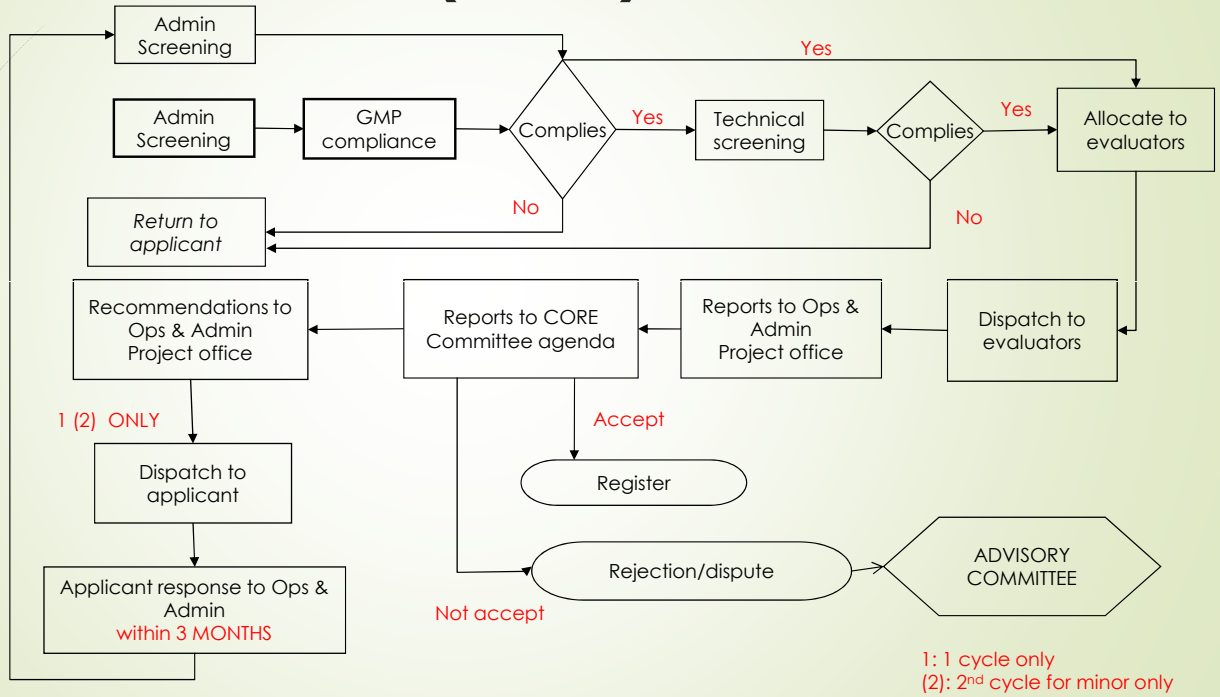

Example: risk-based stratification (Singapore model)
